Application Support Engineer moving into Product. Two years on a post-trade settlements platform processing **$20–30B daily** for Tier-1 banks, turning client pain points into requirements, process fixes and automated internal workflows.

Experience

- **Baton Systems** — Chennai, Tamil Nadu
  Application Support Engineer — Dec 2024 – Present
  Post-trade settlements platform supporting **$20–30B in daily settlements** for JPMorgan, Citi, HSBC, Goldman Sachs, RBC and Citadel.
  - Identified **10+ recurring incident patterns** through ticket-trend analysis across 6 client environments and drove fixes into the **product backlog** with engineering, cutting repeat escalations by **~15%**.
  - Acted as **voice of the customer** for Tier-1 bank clients: translated production issues into clear **requirements and user stories** for product and engineering teams.
  - Built a **Claude-assisted workflow** that automates the weekly High Urgency Alert report and RCA drafting, reducing reporting time from **~12 hours to under 1 hour** a week.
  - Authored **40+ Root Cause Analysis reports** for senior management and bank clients, each closing with process or product recommendations.
  - Wrote and maintained **15+ runbooks** and process workflows, reducing incident resolution time by **~20%** and new-hire ramp-up by **~2 weeks**.
  - Owned SLA tracking and status reporting to client stakeholders, maintaining **98%+ SLA compliance**.
  - Coordinated incident response with DevOps, QA and product teams on **Kubernetes/EKS** environments.

  Application Support Engineer Intern — May 2023 – Jun 2023
- **Nester's Hub** — Bengaluru, Karnataka
  Marketing & Analytics Intern — Oct 2023 – Nov 2023
  - Analysed campaign data (**ROAS, CPL, CTR**) in **Meta Ads Manager** and **Google Analytics** and presented insights to stakeholders.
  - Ran **A/B tests** on ads and landing pages and turned results into revised campaign briefs.
  - Produced competitor and market research reports that shaped quarterly campaign strategy.
- **Ullas Trust (NGO)** — Chennai, Tamil Nadu
  Marketing Intern — Jul 2022 – Aug 2022
  - Ran paid digital campaigns on a tight NGO budget, meeting awareness and outreach goals.
  - Improved search visibility through on-page and off-page SEO.

Projects

- **HUR & RCA Automation** — Baton Systems
  - Spotted that weekly alert reporting and RCA drafting were manual and repetitive; designed a **Claude workflow** with an automated **data scraper across Confluence, Jira and Slack** that produces both, and documented it as a repeatable process. **Adopted team-wide**, saving hours of manual reporting for the whole team every week.
- **Daily Tracking App** — Personal
  - Designed and built a personal **lifestyle tracking app** with **Claude Code**, bringing daily health and fitness habits into one simple tool.

Education

- **St. Joseph's College of Commerce** — Bengaluru, Karnataka
  BBA, Marketing & Business Management — Aug 2021 – Aug 2024
  - **1st place**, Inter-Collegiate Marketing Fest (all Bengaluru colleges): live campaign strategy and pitch.
  - Captain, eSports team · Member of the Finance Club, Quiz Club and Business Team.

Achievements

- **National eSports Athlete of the Year**, 2019 and 2020: one of fewer than 10 players in India recognised in both years.

Certifications

- Prompt Engineering, Anthropic Claude (Claude Code) · Google Analytics 4, Google Skillshop · Meta Blueprint: Digital Marketing Associate (in progress)

Skills

- **Product:** Requirements Gathering, User Stories, Prioritisation, Gap Analysis, Root Cause Analysis, A/B Testing, Process Design
